Practical - 12

Event Management CRUD with Poster Upload and File Validation

A . Theory

Develop event management functionality for admin users. Admin can add, view, update, delete, and upload event posters with file type and file size validation..

1. Are add, update, and delete functionalities implemented correctly? Yes, the add, update, and delete functionalities are implemented to manage student records in the database.

2. Is the UI linked with the database correctly? Yes, the user interface is connected to the MySQL database using PHP and MySQLi to perform database operations.

3. Are poster uploads validated for type and size? Poster uploads are validated for file type and size before being uploaded to prevent unsupported or oversized files.

4. Are success and failure messages displayed? Yes, appropriate success and error messages are displayed to inform the user whether an operation was completed successfully or failed.

B. Implementation/ Output/Result

Here is my GitHub repo link the codes are here in repo:
https://github.com/dhyaani19/StudentHub-Portal.git

C.. Evidence of Work (Screenshots)

Figure 12.1 : index page

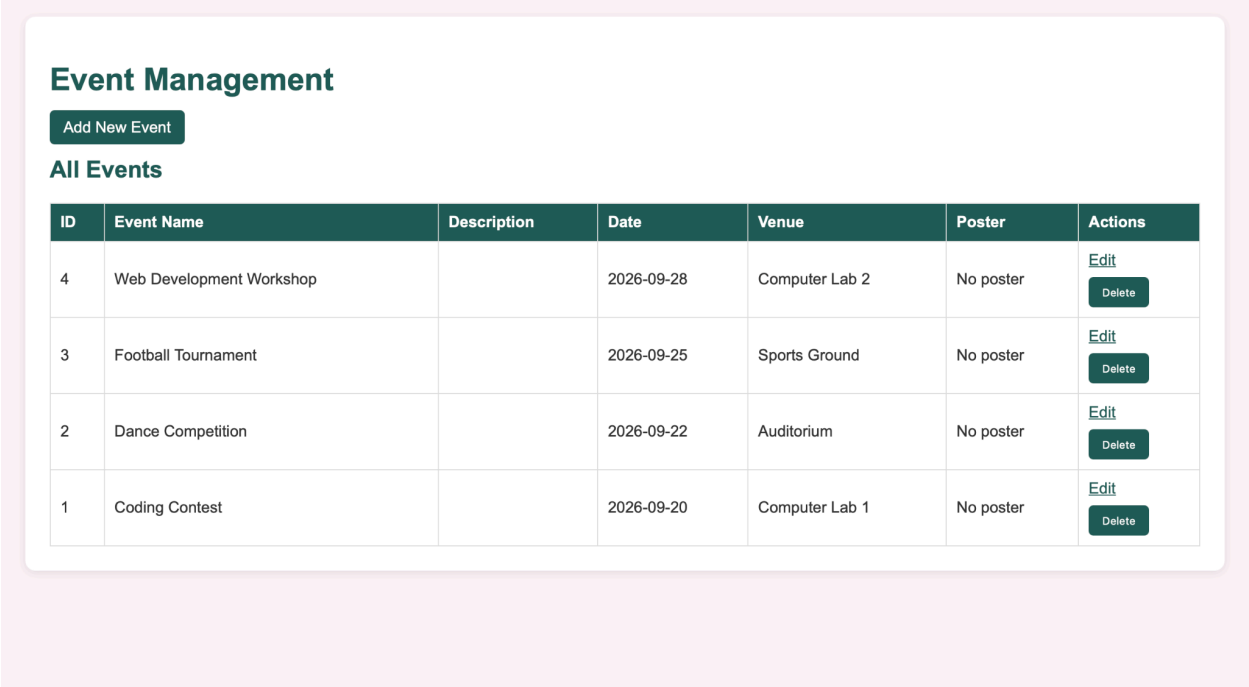

Figure 12.2 : Add Events

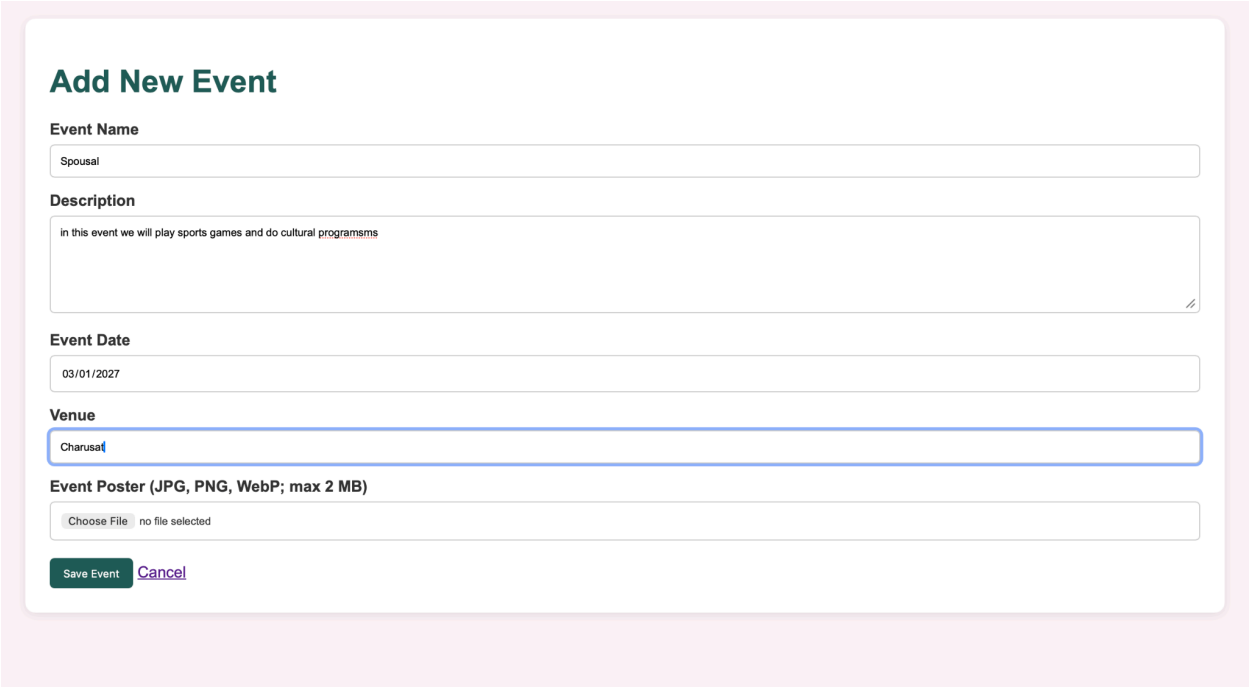

Figure 12.3 Edit event

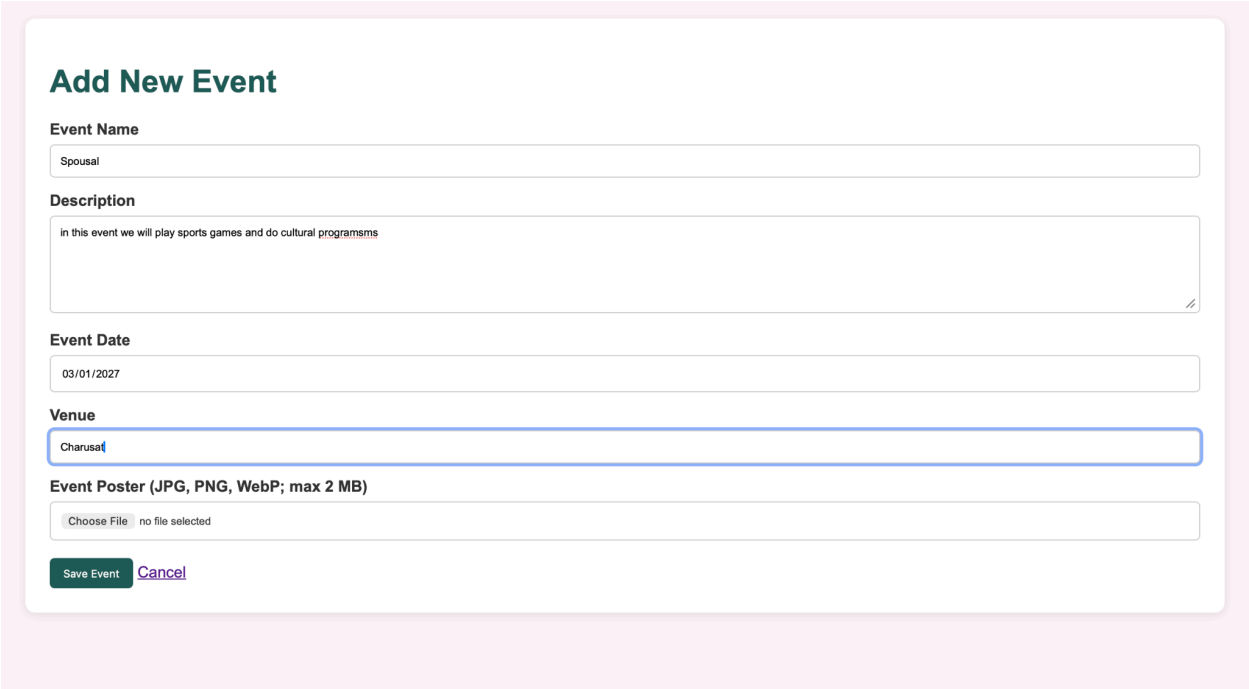

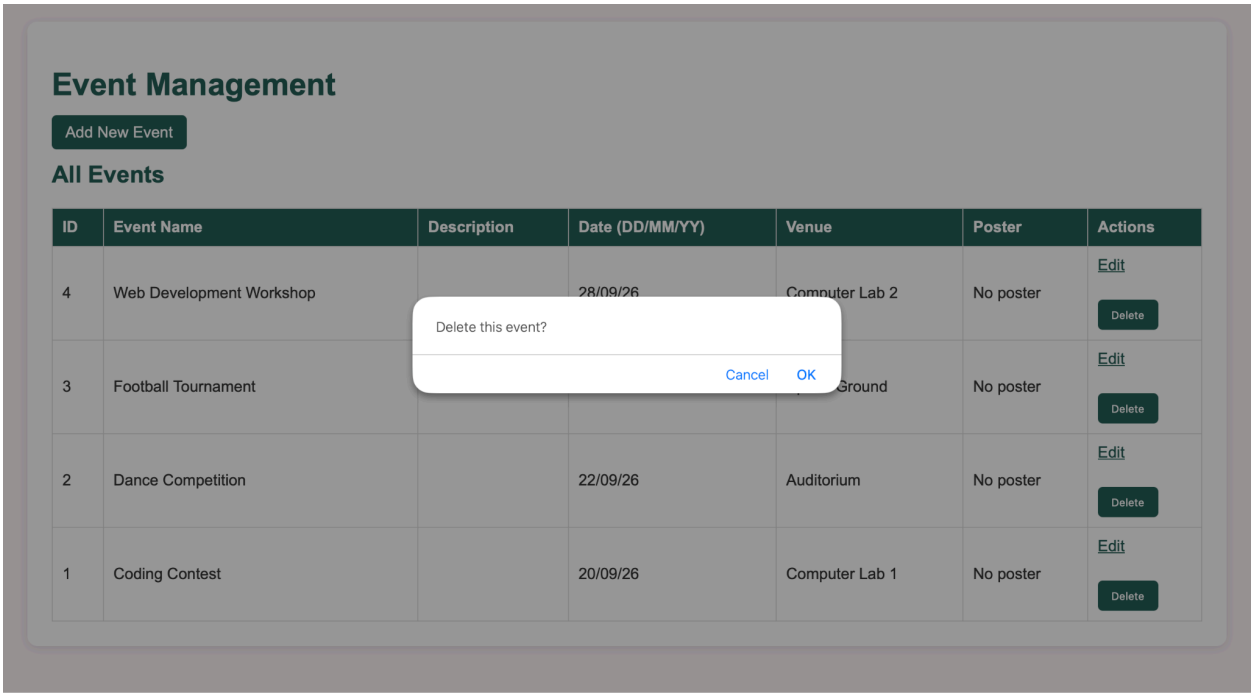

Figure 12.4 Delete event

E. Challenges Faced:

During this practical, I faced some difficulties in connecting the event management module with the database and performing add, update, and delete operations correctly. Handling poster uploads was also a little challenging because I had to validate the file type and size before uploading. I also learned to handle errors and display proper messages when an operation was successful or failed.

F. Learning Outcomes:

Through this practical, I learned how to develop an event management system using PHP and MySQLi. I understood how to add, view, update, and delete event details from the database. I also learned how to upload event posters, validate their file type and size, and display them on the website. This practical helped me understand how file handling and database operations work together in a web application.

Faculty Remarks:
